

Transmit the power X4 Academy Licence

The Academy pack is specially conceived for teaching 3D metrology:

- Software known for its ease of use and ergonomics.
- Industry-standard solutions for treating geometric tolerances and interpreting the results.
- The most-used software in cutting-edge industry: automotive, aeronautics, energy, medical, etc.
- A global learning solution.

Metrologic Group offers a pack of software solutions integrating:

- Metrolog X4, the universal solution connected to the measurement instruments
- Silma X4, the simulation solution for learning without measurement instruments
- A reactive technical support

Exploit the technologies of the future (online means, CMM, arm, laser tracker, robot, optical sensors, augmented reality, etc.) to immerse your students in the industry of tomorrow.

Universal and compatible with the main measurement instruments

Licenses connected to measurement instruments or in simulation mode

Update and technical support adapted to education

Graphical user-friendly interface for optimal learning

Geometrical Tolerances calculation engine that follows ISO and ASME norms

Learning with high-performance and recognized solutions

Benefit from a global educational solution

Metrolog X4

The best universal 3D metrology software

- Interfaces with the main measurement instruments on the market
- Maximum performance for point cloud processing
- High performance for processing large volumes of data
- Supports measurement instruments from large to small
- The most robust engine for processing geometric and dimensional tolerances
- Advanced programming module
- A customizable report editor

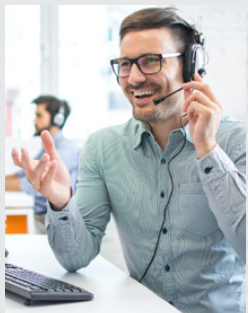

Silma X4

Powerful and innovative inspection-simulation solution

- Offline programming solution for your measurement means, allowing the creation and simulation of measurement programs.
- Definition of the complete measuring-cell environment
- Assisted or automated generation of measurement trajectories
- Transfer of programs to measurement means for execution
- Support for advanced business functions

SUPPORT FROM OUR TECHNICAL EXPERTS

40 years of metrology experience to help you configure and parametrize your X4 software. All the advantages of our maintenance contract: Visit our website:

PROJECT YOURSELF INTO INDUSTRY 4.0

Discover the solutions dedicated to the factory of the future

Metrologic Group integrates an innovative approach with the development of universal 3D measurement solutions that meet the challenges of the industry of the future—more connected, more intelligent, more autonomous, and more digitized.
